

I have coal.

Who has the energy source emitted by the sun?

I have biomass.

Who has the flow of electrons?

I have solar energy.

Who has the light bulb that uses a fourth the energy of incandescents?

I have electricity.

Who has the fossil fuel that is also called oil?

I have CFL.

Who has heat from within the earth?

I have petroleum.

Who has the person who created the first electric cell?

I have geothermal.

Who has the person who developed alternating current (AC)?

I have Alessandro Volta.

Who has a nonrenewable energy source that is portable?

I have Westinghouse.

Who has an energy source composed of organic matter?

I have propane.

Who has the person who developed the first practical light bulb?

I have Thomas Edison.

Who has the energy source that involves splitting atoms?

I have hydropower.

Who has the fuel produced by splitting water molecules?

I have uranium.

Who has turning off lights to save energy?

I have hydrogen.

Who has the energy source composed mainly of methane?

I have an energy conservation measure.

Who has the energy in moving air?

I have natural gas.

Who has the form of energy that travels in transverse waves?

I have wind.

Who has the form of energy stored in the bonds between atoms and molecules?

I have radiant energy.

Who has the alternate fuel that combines alcohol with vegetable oils?

I have chemical energy.

Who has the energy from the force of moving water?

I have biodiesel.

Who has the person who established that lightning was a form of electricity?

I have Ben Franklin.

Who has the form of energy that is heat?

I have Edwin Drake.

Who has the sector of the economy that uses the most petroleum?

I have thermal energy.

Who has the person who first realized the relationship between electricity and magnetism?

I have transportation.

Who has a way to cook food outside?

I have Michael Faraday.

Who has a measure of electricity?

I have a solar oven.

Who has a structure with a penstock and a turbine?

I have volts.

Who has a car that is powered by electricity and gasoline?

I have a hydropower dam.

Who has the process that combines hydrogen atoms into helium in the sun?

I have a hybrid vehicle.

Who has the person who drilled the first oil well in the U.S.?

I have nuclear fusion.

Who has the energy source that produces the most electricity in the U.S. today?
