

SAVE ENERGY WITH LIGHTING

Homes and schools use energy for lighting. We use electricity to light most buildings.

Turn off lights when you leave a room. Use the sun's light whenever you can. Use outdoor lights only when needed.

Use only the light you need for a task. To read, for example, use a reading lamp, not an overhead light.

Use energy-saving fluorescent lights in schools. At home, use energy-saving compact fluorescent light bulbs (CFLs) or light emitting diodes (LEDs) instead of incandescent light bulbs. They save energy and money.
